

Precision Fix Level

524 Series

524A-90

524B-70

524C-50

524D-100

Purpose

Machine investigation, assembly, built in machine.,
Machine investigation, assembly, built in machine.
Hole Intervals (mm) 50mm,70mm,90mm

- Small sized precision level with high sensitivity.
- It is made with similar sensitivity as flat levels for general woodworking.
- It can be used for a wide range of applications, like centering on narrow parts position, machine inspection, embedding into assembly machinery etc.
- All the instruments are classified according to sensitivity in order to make support a wide range of applications.

Precision Fix Level

Code No.	Model	Measurement (L×W×H mm)	Sensitivity (mm/m)	Mass(g)	Hole Diameter×Hole Pitch(mm)	Type
AS101	524A	100×20×24	0.05	200	4.5×90	Fixed precision level
AS102			0.1			
AS201	524B	80×18×20	0.5	120	4.5×70	—
AS202			2.0			
AS301	524C	60×18×20	0.5	120	3.5×50	Fixed precision level
AS302			2.0			—
AS401	524D	100×20×24	0.02	250	—	Fixed precision level
AS402			0.05			Precision fix level
AS403			0.1			Fixed precision level
