

GTS810NF **GTS810NF** **GUOOU**

Professional paint coating thickness tester meter gauge digital kit

Weight	1kg
Brand	GuoOu
Payment term	T/T, west union
Price term	EXW, FOB
Place of original	GuangZhou
Package	standard export carton

Digital Portable paint coating thickness tester

The instrument is a portable measuring instrument, it can quickly, without injury, precision coating, coating thickness measurement. Can be used for laboratory, can also be used for the project site. By using different probes, you can also meet the needs of a variety of measurements. The instrument can be widely used in the manufacturing, metal processing industry, chemical industry, commodity inspection, and other testing areas. Is the material protection professional necessary equipment.

Ordering Guide		Measurement methods	Model	Dimensions
Fe iron metal base (steel, iron) non-magnetic coating	Integral stype	Magnetic method (F-type probe)	GTS810F	102mm*66mm*24mm
	Split type		GTS820F	102mm*66mm*24mm
NFe Non-ferrous metal (aluminum copper) on the insulation coating	Integral stype	Eddy current method (N-type probe)	GTS810NF	102mm*66mm*24mm
	Split type		GTS820NF	102mm*66mm*24mm
Fe/NFe all metal(Dual purpose)	Integral stype	Magnetic method (F-type probe)	GTS8102	102mm*66mm*24mm
	Split type		GTS8202	102mm*66mm*24mm
		Eddy current method (N-type probe)
